LOOKING FOR
Product leadership roles in data, experimentation and AI · available now

SCOPE
Led teams of 10 to 20 product managers; telemetry from 1.6B+ Windows devices

BACKGROUND
Product leader since 2008, software engineer and team lead before that

SUMMARY

Principal product leader with more than a decade at Microsoft building the data products, metrics, experimentation platforms and ML-powered insights that decide what ships across more than 1.6 billion Windows devices. I led teams of 10 to 20 product managers, turned telemetry and customer signals into decision systems used by engineers and product leaders, and kept building myself, most recently in AI.

KEY ACHIEVEMENTS

250%+
growth in monthly active spatial-audio devices

1.6B+
Windows devices informing product decisions

15%
increase in Windows adoption

30%
reduction in customer issues

SKILLS

Product strategy and roadmaps · Data platforms and telemetry · Experimentation and A/B testing · Machine learning and AI products · Metrics and decision systems · Leading PM teams (10 to 20 PMs) · Stakeholder and executive communication · Go-to-market and partnerships · Software engineering background (C#, .NET)

EXPERIENCE

Dec 2024 - Sep 2026

Principal Group Product Manager - Windows & Devices Data

Microsoft · Redmond, Washington

Led product management for the entire Windows & Devices Data organization: the data, insights, experimentation, and machine learning models that power decision-making across Windows and Devices.

- Led a PM organization of 10 to 20, initially through three people managers, and designed its move to a flatter structure; roughly half the team was promoted under my leadership.
- Owned strategy and roadmap for the data platform and insights products Windows engineers and PMs use to ship higher-quality releases.
- Built the quality measurement framework that underpinned Windows K2, Microsoft's high-profile push to improve Windows reliability and performance.
- Ran the weekly ship-readiness quality review where Windows VPs made release decisions based on my team's data on ship-blocking issues.
- Scaled experimentation adoption across Windows, significantly reducing the number of features pulled back after release.
- Owned the multi-million-dollar Windows data infrastructure budget; shut down a low-adoption on-device model platform and reinvested in platform modernization, cutting costs 30% over two years.
- Shifted the team to AI-driven analytics and launched the first version, letting people ask business questions in natural language across every source in the data platform instead of relying on fixed queries.
- Partnered with engineering, data science, and research leadership across telemetry from more than 1.6 billion Windows devices.

Feb 2020 - Dec 2024

Principal Product Manager Lead - Windows Data

Microsoft · Redmond, Washington

Built data products that told the story of the Windows customer experience and informed continuous improvement.

- Redefined Windows quality measurement around end-to-end scenarios like gaming and the shell, creating the Perfect Day metric for issue-free user days.
- Drove measurable quality gains, with Perfect Day improving about 5% for gaming and 3–4% for the Windows shell.
- Enabled data-supported decisions on hardware, software, and services quality, from the Insider preview channels to retail.
- Helped teams detect and address issues affecting customer experiences faster.

Sep 2019 - Feb 2020

Principal Product Manager Lead - Azure DevOps

Microsoft · Redmond, Washington

Defined new products, go-to-market strategies, and business decisions for the Azure DevOps Platform.

- Authored a DataOps product proposal compelling enough that the team building it was moved to GitHub, as the better home for the product.

Jan 2018 - Sep 2019

Principal Product Manager Lead - Silicon, Graphics, Media

Microsoft · Redmond, Washington

Led audio, spatial audio, game streaming, xCloud, Game DVR, broadcast, and casting initiatives.

- Led the Microsoft Spatial Audio Platform across Windows, Xbox One, and new platforms.

Sep 2017 - Jan 2018

Principal Product Manager - Silicon, Graphics, Media

Microsoft · Redmond, Washington

Drove the Windows Sonic spatial audio platform for Windows and Xbox One while representing Microsoft at developer and game conferences.

- Drove the launch of Dolby Access v3 and DTS Sound Unbound with new app services, licensing, and customization models.

Oct 2008 - Aug 2017

Senior Product Manager - Silicon, Graphics, Media

Microsoft · Redmond, Washington

Developed the Spatial Audio Platform, including Windows Sonic, for Windows and Xbox One.

- Brought spatial sound to Windows and Xbox: Windows Sonic for headphones, plus Dolby Atmos and DTS:X across headphones, home theater, and built-in laptop speakers on Surface, Lenovo and other devices.

EARLIER CAREER · BELGIUM

Jan 2005 - Dec 2006 — **Lead Developer and Team Lead**, Compuware · Belgium
Led a team of about 15 developers and the Project Support Office for Fluxys.

Jan 2004 - Dec 2005 — **Software Developer**, Cosmos · Antwerp Area, Belgium
Built and supported software components across C# client and Java server systems using CORBA middleware.

Jan 2001 - Dec 2004 — **Developer and Trainer**, Info Support · Belgium
Developed distributed .NET applications and trained teams across multiple organizations.

EDUCATION

Bachelor's degree, Computer Science
Karel de Grote, Belgium · 2000 - 2004

Languages
Dutch and English (native), French (intermediate)

HONORS

Lighthouse Award for Teamwork (2012) · Compass Award for Individual Excellence (2011) · Gold Star Award (2011) · Microsoft MVP: VS Team System (2006)

PATENTS AND PRESS

19 granted US patents, 7 published applications
Spatial audio, streaming, media and device telemetry (Microsoft). Press: Forbes, Windows Central; Build 2016 speaker.
