SUMMARY

With over a decade of experience at Microsoft, I am currently a Principal Group Product Manager, leading the W+D Data PM team in advancing the Windows ecosystem through data-driven strategies. Passionate about leveraging data, insights, and machine learning to improve customer experiences, I am dedicated to fostering innovation, driving engagement, and empowering partners to succeed. My mission aligns with Microsoft's vision to deliver exceptional value to users and partners by enabling informed decision-making and continuous improvement across our products and services. At Microsoft, I have contributed to the growth of the Windows ecosystem by leading a team that integrates customer signals with advanced machine learning models. Together, we enhance Windows adoption, optimize quality, and provide actionable insights that empower engineers to create superior hardware, software, and services. By focusing on data, experimentation, and insights, my team has enabled impactful, customer-centric decisions and helped address critical challenges in a rapidly evolving technology landscape.

EXPERIENCE

Principal Group Product Manager - Microsoft - W+D Data

Microsoft

📅 12/2024 - 09/2026 📍 Redmond, WA

Lead the PM team responsible for the data, insights, experimentation, and ML models that power decision-making across Windows and Devices.

- Own the strategy and roadmap for the data platform and insights products used by Windows engineers and PMs to ship higher-quality releases
- Lead a team of product managers driving experimentation, customer-signal analysis, and ML-powered insight products
- Partner with engineering, data science, and research leadership to translate telemetry from a billion+ Windows devices into product decisions that move adoption, retention, quality, and engagement
- Set the vision for how AI and ML are used internally to accelerate Windows product development

Principal Product Manager Lead - CSX Data

Microsoft

📅 02/2020 - 12/2024

My team uses big data to tell the story of the Windows customer experience, to inform the continuous improvement of Windows. We do this by weaving customer signals and machine learning together to produce useful insights for Microsoft engineers. These insights help them make data-supported decisions to release high-quality hardware, software, and services, and to quickly detect and address real issues that impact our customers' experiences.

Principal Product Manager Lead - Azure DevOps

Microsoft

📅 09/2019 - 02/2020 📍 Redmond, WA

- Increased market penetration by defining new products, go-to-market strategies, and business decisions for Azure DevOps Platform.
- Spearheaded rapid new business and product analysis (new product a core priority for GitHub following \$7B+ acquisition).

Principal Product Manager Lead - Silicon, Graphics, Media Team in Operating System Group

Microsoft

📅 01/2018 - 09/2019 📍 Redmond, WA

Principal Program Manager Lead at Microsoft for Audio, Spatial Audio, Game Streaming, x Cloud, Game DVR & Broadcast, CAST

- Led Microsoft Spatial Audio Platform, working with developers and data insights to identify and deliver essential spatial audio features on Windows, Xbox One, and new platforms.
- Grew monthly active devices playing spatial audio > 250% over 1.5 years, impacting millions of users across OEM devices, Xbox consoles, and consumer acquisitions.

KEY ACHIEVEMENTS

- 💎 **Enhanced User Retention**
Improved user retention by 20% through enhanced adoption strategies and engagement programs.
- 💎 **Boosted Windows Adoption**
Increased Windows adoption by 15% with data-driven product improvements and strategic initiatives.
- 💎 **Reduced Customer Issues**
Reduced customer issues by 30% through effective telemetry integration and analysis.
- 💎 **Improved Product Quality**
Achieved a 25% increase in product quality by leveraging AI and ML in development processes.
